

SANI-SHIELD[®]

HYDRO FOAMER

The new SANI-SHIELD Hydro Foamer combines an automatic dilution feature with the convenience of a hand-held applicator. Using the Hydro Foamer, SANI-SHIELD provides a thick rich foam that cleans & shields large surface areas in 1-Step. For heavier soil, use an extension brush and the "clinging SANI-SHIELD foam" to thoroughly clean surfaces. The on-off functions of the foamer use the trigger spray gun to only use the amount of product that you actually need. After spray foaming and/or brushing the surface, simply rinse the surface with the wash/rinse quick coupler. SANI-SHIELD and the hydro foamer team-up to make the perfect cleaning solution for so many applications, and will save end-users time, labor and money ordinarily spent buying excess or harsh chemicals.

BENEFITS

- Cleans & Shields surfaces with an antimicrobial-resistant barrier coating technology in 1-Step
- Great for cleaning large or hard to reach areas serviced by drains to capture the rinse water.
- Economical when using the SANI-SHIELD Concentrate at 24 or 34 to 1 dilutions
- Increased cleaning efficiency & employee productivity
- Maximized cleaning performance with SANI-SHIELD "barrier" coating technology for reduced adhesion and build-up of re-soiling for easier next-time cleaning
- Saves time, labor & cost of excess & unnecessary chemicals

COMMERCIAL

- Restaurants (kitchens & restrooms)
- Penal institutions (shower areas)
- Health care and school facilities
- Supermarkets
- Service stations
- Food processing plants
- Animal care/research facilities

APPLICATIONS

- Walls, Floors & Doors
- Sinks & Fixtures
- Urinals & Toilets
- Partitions
