

USE SANI-SHIELD® & SANI-SCRUB® FOR IMPROVED SURFACE HYGIENE BY CLEANING & SHIELDING SURFACES IN 1-STEP!

CDC (Centers for Disease Control) & EPA (Environmental Protection Agency)

The CDC stresses that frequent & proper hand washing is the best way to control the spread and impact of human contact germs. *What about surface contact germs?* The EPA requires environmental surfaces to be pre-cleaned before any of the 5,000 plus EPA-registered sanitizers and disinfectants are used to control the contamination and cross-contamination of surface-contact pathogenic organisms.

PRE-CLEANING

Disinfectants require pre-cleaning of the surface to be effective. Even frequent disinfecting of surfaces will not prevent the re-soiling and re-contamination which can reoccur within seconds! That's why you need the newly-patented SANI-SHIELD and SANI-SCRUB; the only surface care technologies that clean & shield surfaces in 1-step...simultaneously, with each use.

When cleaning you must remove the visible & invisible organic and inorganic matter from objects and surfaces using a combination of chemical and mechanical action. When you clean & shield you can simultaneously apply a barrier coating to protect the surface and reduce the adhesion and build-up of re-soiling and re-contamination.

CROSS-SECTION OF TYPICAL SURFACE

SURFACE WITH INVISIBLE PROTECTION

REPELLENT BARRIER COATING

Hard surfaces are like sponges. They have microscopic pores that trap water, organic & inorganic soil that combine, attach to the pores and build-up on the surface.

SANI-SHIELD cleans 99.9% of organic soils with the oxydizing power of hydrogen peroxide & SANI-SCRUB removes organic and inorganic matter with the power of aluminum oxide & surfactants. Both products protect surfaces with invisible water, soil & stain repellent barrier coatings that dramatically reduce the adhesion & build-up of re-soiling for easier next-time cleaning...and prevent the growth of re-deposited odor-causing bacteria, mold & mildew in-between cleaning.

SANI-SHIELD & SANI-SCRUB

With their broad-spectrum cleaning utility, ease of use, and functionality on all horizontal, vertical and rounded surfaces, these new, value-added "clean & shield" products consistently out-perform other traditional cleaners.
